WHEN “SNOWED IN” ISN’T PART OF YOUR VOCABULARY

TRACKS BUILT TO PERFORM

No traction? No problem. The Apache XC Tracks make conquering serious terrain effortless, delivering exceptional flotation and rock-solid stability. Whether you are tackling deep snow, thick mud, or anything in between, these durable tracks optimize attack angles and minimize noise to ensure confident, all-season performance.

Aggressive lugs deliver max traction without sacrificing handling. A reinforced steel frame boosts strength, while the center slide improves alignment and reduces de-tracking. Reduced NVH levels and the wheel placement ensure smooth, quiet power delivery. Plus, wheel longevity is increased with replaceable wheel bearings.

PLOW SMARTER, NOT HARDER

The Outlander G3 and G3L Can-Am ProMount plows are easy to install while being tough on snow. With the Can-Am ProMount mounting pins, there’s no drilling and no guesswork. Just a clean fit that stays installed year-round without sacrificing ground clearance.
